

# Going plural

Compositional routes to multiplicity in natural language

Patrick D. Elliott

October 9, 2022

## 1 Class description

In this class we'll develop a compositional approach to plurality using concepts from Boolean algebra. We'll primarily be following Yoad Winter's 2001 book "Flexibility Principles in Boolean Semantics - the Interpretation of Coordination, Plurality, and Scope in Natural Language", chapter by chapter. We'll begin by asking: what is the role of natural language coordination ("and") in forming *pluralities*? Cross-linguistically, many languages use exactly the same coordinator to express both boolean conjunction, and an operation we might call *group-formation*. We'll investigate exactly why this might be. Later in the course, we'll discuss other semantic phenomena which require reference to pluralities, and ramifications for the compositional apparatus.

## 2 Prerequisites

- At least one introductory class in compositional semantics, with similar coverage to *Semantics in Generative Grammar* (Heim & Kratzer 1998).
- At least one class covering basic formal methods, i.e., logic (up to first order), and set theory.

## 3 Contact information

- Instructor: Patrick Elliott (<https://patrickdelliott.com>)
- Email: [patrick.d.elliott@gmail.com](mailto:patrick.d.elliott@gmail.com)
- Secretary: Tim Marton: [tim.marton@phil.hhu.de](mailto:tim.marton@phil.hhu.de)
- For any questions, please use the rocket chat channel. You should have received an invitation.
- For office hours, please don't hesitate to email me to schedule an ad-hoc meeting.

## 4 Online and offline info

- Meetings will take place in person, in 23.21.U1.72.
- If circumstances (illness, Deutsche Bahn...) demand that the class go remote, I'll send out a zoom/webex link via rocket chat.
- Mondays, 14:30-16:00.

## 5 Schedule

Total of 15 sessions:

date	topic (tentative)
Mon Oct 10	Preliminaries + flexible coordination
Mon Oct 17	Flexible coordination cont.
Mon Oct 24	The type-theoretic approach to multiplicity
Mon Oct 31	Hydras and pair-quantification
Mon Nov 7	Indefinites and numerals
Mon Nov 14	Predicate-quantifier flexibility
Mon Nov 21	Plural quantification and atom vs. set
Mon Nov 28	Distributivity
Mon Dec 5	Cumulativity
Mon Dec 12	Cumulativity cont.
<b>winter break</b>	
Mon Dec 19	Homogeneity
Mon Jan 9	Homogeneity cont.
Mon Jan 16	Student presentations
Mon Jan 23	Student presentations
Mon Jan 30	Student presentations

## 6 Assessment

### 6.1 Beteiligungsnachweis

- Regular active participation.
- Do the readings.

### 6.2 Requirements for Abschlussprüfung

- One class presentation (this can be either a reading group style presentation of a paper, or a group discussion of your squib topic).
- A squib (i.e., short research paper, max 12 pages, preferably 5-10).
  - At least one meeting with me to discuss your squib topic.

The etymology of “squib”, according to Haj Ross:<sup>1</sup>

<sup>1</sup><https://www.ucl.ac.uk/pals/linguistic-inquiry-squibs-discussion>

WRT the word: I no longer know – my memory is too foggy over the  $48 \pm$  years since I started collecting them. I got to MIT in January of 1964; George Lakoff was an assistant professor at Harvard; we both were research assistants in Susumu Kuno’s lab, and we squibbed well and truly on a daily basis. I have asked George whether he knows who came up with the term or not; he says he is positive: I was the one. Could be – I certainly can’t deny responsibility.

At some point I went looking in the OED to see if it contained a meaning like “short note” or anything like that. My wretched memory tells me that yes, there was such a meaning among the many that the OED offered up, but when I went this morning to look again for it for you, not a bit of it. There is one basic meaning, which has to do with with some kind of firework. But one of the citations is

1599 Master Broughtons Lett. 47 Your bookes [are] but squibs, compounds of gunpowder and pisse.

Which I think would be an excellent sentence to have at the beginning of every squib section in each issue of LI.

## **7 Readings**

### **7.1 Flexible coordination**

- Primary: Chapter 1 of (Winter 2001)
- Optional
  - (Partee & Rooth 1983)
  - (Partee 1986)

### **7.2 The type-theoretic approach to multiplicity**

- Primary: Chapter 2 of (Winter 2001)

### **7.3 Hydras and pair-quantification**

- Primary: (Champollion 2016)
- Optional:
  - (Link 1984)

- (Fox & Johnson 2016)

## **7.4 Indefinites and numerals**

- Primary: Chapter 3 of (Winter 2001)

## **7.5 Predicate-quantifier flexibility**

- Primary: Chapter 4 of (Winter 2001)
- Optional:
  - (Partee 1986)
  - (Winter 2022)

## **7.6 Plural quantification and atom vs. set**

- Primary: Chapter 5 of (Winter 2001)
- Optional:
  - (Kuhn 2020)
  - (Winter 1998)
  - (de Vries 2015)

## **7.7 Distributivity**

- Primary: Chapter 6 of (Winter 2001)

## **7.8 Cumulativity**

- Primary: (Chatain 2021)

## 7.9 Homogeneity

- (Križ 2017)
- (Bar-Lev 2018)
- (Križ & Spector 2021)
